Model LSH08

Section 12

With the power to lift 1000 to 10,000 lbs. up to 129", the LSH08 Hydraulic Scissor Lift Table employs a 48" wide platform with varying length options, from 64" to 158". Most variations of the lift have a 17" lowered height with a raised height range from 47" to 87", with the raised height of

129" obtained with a lowered height of 24".

Two or three cylinders support the powerful scissors that provide solid, stable lifting of up to 10,000 pounds to great heights. This powerful lift is the foundation of several lift combinations that provide incredible lifting power and raised heights.

Standard Features

- Low profile accommodates a wide range of worker heights and applications
- Modular design is easily customizable to application specifications
- High-strength steel, welded construction built to safety factors required by customer application and in compliance with ANSI MH29.1-1994
- High capacity lifting up to 57,000 lbs (25,855 kg)
- · Variable duty cycles from low to high for cost flexibility to fit each application
- Self-lubricating PTFE overlay on bearings at all pivot points for high loads and long life
- Captured wheel guides to prevent top and bottom lift platforms from tipping
- Stackable lift modules for added lift travel
- Virtually maintenance-free for low-cost operation and minimal downtime
- Enamel-based acrylic paint applied to all surfaces after being cleaned and primed
- Welded cylinder contrustion honed steel, piston rod chromed, ground, and polished
- NEMA 4X and 13 push button control enclosure for washdown, oil, and corrosion protection
- Pressure relief valve to ensure safe line pressure
- Check valve for pump protection
- Maintenance stop to ensure safe line pressure

Options

- · Portability kits allows lift system to be moved with ease
- · High speed capability with a full cycle in under 10 seconds
- Safety skirting to protect from pinch points and debris

Values rounded to the nearest 1"

Notes

Ship weights are estimated and do not include oversize platforms or options

Width and length dimensions reference the main structure of the lift system and do not include structures such as floor tabs, bolt heads, etc. See drawing for actual dimensions

Lifts must be center loaded when at full capacity

Side and end load capacities are derated 2% per inch of increase top plate size from base size
